## TECHNICAL DATA SHEET

PRODUCT NAME	LYSORUS
PRODUCT CATEGORY	ANTI-VIRAL & BACTERIAL
MANUFACTURED BY	EZZY BIOSCIENCES PVT.LTD.
FACTORY ADDRESS	KHASRA No.90/1 GRAM MEHRJA , KHARGONE 451001
OFFICE ADDRESS	1304, MARATHON ICON NEXTGEN CAMPUS OFF GANPATRAO KADAM MARG LOWER PAREL (W) MUMBAI -400013 (MH) INDIA, Ph- +9102241206505

### GENERAL PRODUCT INFORMATION

- Lysorus (Anti-virus & bacteria) is a multi purpose enzyme which protect plants from bacteria and virus, it is capable of breaking the chemical bonds of the outer cell wall of the bacteria and virus.
- Lysorus has true activity against bacteria and virus leading to long term protection of crop from bacterial and viral infection.
- Lysorus is 100% toxic free product. Its uses is environmentally safe.
- Lysorus has also additional feature of in stimulation of plant growth & development with nutritional advantages and growth benefits.
- Lysorus is Appropriately designed for modern field application with flexible use in conventional & organic cropping system.
- Lysorus works as preventive as well as curative.
- It offers better stress tolerance capacity against variety of stresses hence increasing the plants survival rate
- Stimulates rapid stem and root growth.

### TECHNICAL DATA

Parameters	Lysorus	Activator	TARGET DISEASE
Appearance	Powder	Liquid	Lysorus Recommended on broad classes of plant viruses such as potato virus, cauliflower mosaic virus, leaf curl virus, yellow mosaic virus , and bacterial disease such as bacterial leaf blight , citrus cancer, stem rot and tuber rot of potato etc.
Color	Off White	Little Yellow	
Odor	Characteristics	Characteristics	
Solubility	NA	Water Soluble	
pH	NA	6 ±0.5	
Specific Gravity	NA	1.02 gm/cm <sup>3</sup>	

### METHOD OF APPLICATION & RECOMMENDED DOSAGE

- 1.Recommended Crop** - Lysorus is recommoned for all drops that are affected by virus like - like Cereals, Vegetable, top fruits, spices and medicinal crop etc.
- 2.Recommended Dosage** - 1 gm Lysorus + 50 ml Activator/ acre
- 3.Mode Of Application** - Foliar application
- 4.Method of Application** - First add 1gm lysorus powder into water and then add 50 ml Activator to spray crop of 1 acre .
- 5.Recommended additions**- 2 to 3 times during the growth and development stages of the plant and on appearance of bacterial and viral infection.
- 6.Time Of Application** - Preferably before or after Infection of virus

### DANGEROUS GOOD CLASSIFICATION

Dangerous Good	Not Classified
Hazardous Material Regulation	Not Classified

### STORAGE

This product can be stored in the unopened original container for 3 years. Opened containers should be used up or be resealed immediately.
